PROGRAM AIMS

After completing our in-house training course, participants should have a solid grasp on the key steps involved in the strategic workforce planning process and be armed with a toolkit to develop a strategic workforce plan for their organisation.

This hands on, practical course will enable the building, implementation and monitoring of strategic workforce planning as well as integration it into business as usual.

With a focus on developing an evidence based approach, our program assists with building solid foundations to support and inform people and organisational decisions.

Our approach is designed to support and enhance your existing workforce planning processes or provide you with a framework to commence your workforce planning journey.

DAY 1

- **Introduction to SWP**

Definitions; principles; benefits

- **Strategic workforce planning process**

WPI approach; framework;

methodology; organisational alignment

- **Future state**

Strategic alignment; environmental scan;

enterprise capabilities; the workforce strategy

DAY 2

- **Current state**

Labour market scans; data analysis; profile & segmentation; critical roles

- **Gap & risk analysis**

Gap analysis; risk analysis; priorities

- **The workforce plan**

Workforce development strategies; action planning; scenario planning; refreshing the plan
